BIONOVA

Software & Expert Services Business

🔑 Tenant

Bionova's mission is to make sustainable design and construction easy, making the delivery of sustainable buildings the norm. Developer of world-leading 'One Click LCA'; an easy to use, integrated and fast life-cycle metrics software that reduces carbon, costs and material use, and supports the achievement of green building certifications and compliance requirements.

1 building

Active in over 60 countries

20 tCO₂e portfolio carbon emissions

21 employees

1 Commit

Commit to minimise energy and material use in current premises.

2 Disclose

Disclose Scope 1 and 2 emissions performance annually.

3 Act

Renovate premises with maximum circularity of materials, invest in off-site renewable production up to three times of demand, and upgrade fittings and fixtures under portfolio control.

4 Verify

Regularly verify improvements in energy efficiency and emissions reduction to ensure sustained performance, verify via third party review.

5 Advocate

Through the promotion and development of One Click LCA, advocate for life-cycle based carbon and cost performance in design, providing advice, software, training and support for the construction sector. Continue to develop life-cycle carbon regulations with Finnish government.

BIONOVA
