BRANDIX

Apparel Manufacturer

Owner

Brandix is a leading apparel manufacturer in the South Asian region, with a vision to be 'The Inspired Solution for Branded Clothing'. Firmly anchored in Sri Lanka, Brandix is one of the largest suppliers of apparel to the United States & Europe for globally renowned fashion brands.

16 buildings

165,000 m² total floor area

24,212 tCO₂e portfolio carbon emissions

30,000 employees

1 Commit

All Brandix factories under direct control will be net zero carbon in operation by 2023. Interim targets to have one factory achieve net zero by 2019, six by 2020 and all remaining by 2023.

2 Disclose

Disclosure of all energy consumption and carbon emissions data online through CSR reporting, via the Brandix Sustainability Report and organisational website.

3 Act

Implement and invest in highly energy efficient technologies and renewable energy (including solar and biomass).

4 Verify

For existing assets, undertake third-party verification of carbon emissions inventory and certification. All new developments to be Net Zero and certified LEED Platinum through LEED-NC and then LEED EB O+M.

5 Advocate

Drive the global apparel manufacturing sector to green the industry, via on-site renewables, resource optimisation, and ongoing third party certification.
