

ECOREAL

Real Estate Services Company

Tenant

EcoReal is an energy service company who develop, design, build and optimise projects to save energy, reduce costs and increase the value of customer's portfolios. Their mission is to decrease emissions and ensure healthy conditions via values of sustainability, accountability and efficiency. In 2016-19, they reduced customer CO₂ emissions by 60,000 tons.

2 buildings

570 m² total floor area

15 tCO₂e portfolio carbon emissions

28 employees

1 Commit

All premises to continue to be net zero carbon in operation.

2 Disclose

Measure Scope 1 and 2 consumption and emissions, disclose results in annual reporting via Global Reporting Initiative (GRI).

3 Act

New real estate acquisitions will be in a near zero energy building with 100% renewable energy procured. Any unavoidable emissions will be offset.

4 Verify

Energy consumption performance and emission reductions will be verified via third party carbon accounting.

5 Advocate

Through core service offerings, work with customer real estate portfolios towards decarbonisation by enhancing energy performance with the design, implementation and financing of energy-efficient building solutions and local renewable energy production.
