

ADVANCING NET ZERO

Business | City | States & Regions

SHAW CONTRACT

Product manufacturer

Key Tenant Home Owner

Recently purchased renewable energy certificates and carbon credits to offset all division-related 2017 energy and carbon emissions to achieve net zero. Have implemented on-site solar, enrolled two locations in USEPA Green Power Partnership program and are part of the Better Plants Challenge.

28 buildings
360,450m² total floor area
57,500 tCO₂e portfolio carbon emissions
5,000 employees

1 Commit

Committed to owning and occupying net zero buildings in operation including manufacturing associated emissions.

2 Disclose

Disclose Scope 1 and scope 2 operational related emissions through market mechanisms using international reporting protocol.

3 Act

Implement energy efficiency measures to achieve 40% improvement on energy intensity and carbon emissions by 2030. Use renewable sources including offsets to achieve carbon neutrality.

4 Verify

Shaw Contract's Scope 1 and 3 emissions are verified annually as part of Shaw Industries' corporate third party footprint verification process, using international verification protocols.

5 Advocate

Aim to reduce process waste to landfill by 100%, energy intensity by 40% and water intensity by 50% by 2030. Showcase industry leadership by designing 100% of Shaw-made products to the Cradle to Cradle Certified Products Material Health protocols.
