GRANLUND GROUP

Consultancy

Tenant | Owner

Granlund Group operates in the construction and real estate sector focusing on promoting well-being for people, properties and the environment. Their expertise includes technical building services design, property, energy and environmental consultation, software and renovation. Their vision is to create a more sustainable and smart future.

25 buildings

15,170 m² total floor area

1,620 tCO₂e portfolio carbon emissions

1,000 employees

1 Commit

Commit to be carbon neutral across value chain (Scopes 1 & 2) by 2021, including owning and occupying only assets that are net zero carbon in operation.

2 Disclose

Measure and disclose asset level energy consumption and operating scope 1 & 2 carbon emissions as part of annual reporting by 2022.

3 Act

Conduct energy audits on owned assets to improve energy efficiency. Purchase only renewable electricity and district heating, produce solar power on three locations and supply excess power to the grid.

4 Verify

Verify energy consumption and carbon emissions data via a third party.

5 Advocate

Provide carbon neutrality services, promote energy efficiency and cost-efficient sustainable energy solutions in all services. Contribute to public debate on energy transition through social media and memberships of various organisations.
