United Metal Coating (UMC) are a Pre-Painted Aluminium and Steel coils manufacturer with an annual production capacity of 50,000 MT of Aluminium and 140,000 MT of Pre-Painted Steel Coils/year. UMC strives towards creating a net positive manufacturing factory environment with a vision to promote net zero embodied carbon emissions.

**Commit**
Commit to only occupying net zero carbon manufacturing facilities by 2030.

**Disclose**
Measure and disclose scope 1 and 2 emissions via annual sustainability report.

**Act**
Develop and implement a roadmap of improvements including energy efficiency measures as well as on-site and off-site renewable procurement.

**Verify**
Verify via third-party assurance of energy audits and exhibit yearly sustainability reports targeting carbon emission & energy efficiency with a detailed roadmap for net zero carbon emissions.

**Advocate**
Advocate for industry change through being an example of leadership in creating a sustainable factory model. Facilitate change to net zero embodied carbon emissions to create a transparent and closed loop business environment.
