Who we are

WORLD GREEN BUILDING COUNCIL

The World Green Building Council (WorldGBC) catalyses the uptake of sustainable buildings for everyone, everywhere.

Transforming the building and construction sector across three strategic areas — climate action, health & wellbeing, and resources & circularity — we are a global action network comprised of around 70 Green Building Councils around the globe.

As members of the UN Global Compact, we work with businesses, organisations and governments to drive the ambitions of the Paris Agreement and UN Global Goals for Sustainable Development.

Through a systems change approach, our network is leading the industry towards a net zero carbon, healthy, equitable and resilient built environment.

Meet the team

GREEN BUILDING COUNCILS

Green Building Councils are independent, non-profit organisations made up of businesses and organisations working in the building and construction industry.

As members of WorldGBC, they drive sustainability strategies for the built environment and unite as a global network with other GBCs to achieve environmental, economic and social goals on a larger, regional and global scale.

Meet our network

Foreword by our CEO

2020 marked the beginning of ‘the Decade of Climate Action’ and the COVID-19 pandemic brought the interface between the built environment and people’s wellbeing into stark focus.

With COP26 on the horizon, the urgency to adapt faster, support society’s most vulnerable and embrace deep sustainability is greater than ever.

At WorldGBC, we believe the built environment can catalyse a more sustainable, restorative and equitable world.

That is why our network of around 70 Green Building Councils and their 36,000 members, stand behind our bold, new strategy Sustainable Buildings, for Everyone, Everywhere.

Using the Global Goals for Sustainable Development (SDGs) and climate science recommendations as a foundation, our strategy supports an ambitious and regenerative approach for the built environment across three impact areas: Climate Action, Health & Wellbeing and Resources & Circularity.

From wherever you stand in the value chain, you can make a difference. So join us in scaling up the solutions that will enable and accelerate change in the built environment. Join us in making this the decade of climate action and regenerative sustainability for our communities, planet and economies.

Cristina Gamboa,
CEO, World Green Building Council

Historical buildings in Madrid, Spain. Madrid is one of the cities participating in our innovative renovation project, BUILD UPON²
Foreword by our Chair

The past ten years have been a decade of growth for sustainable buildings. From 2010 to 2020, our network of Green Building Councils grew from 41 to 69 — an increase of 68 percent. Members of GBCs increased by 70 percent from 21,000 to 36,000. The accumulated area certified catapulted from 300 million to 3.5 billion square metres — an incredible rise of over 1,000 percent.

Despite this growth, the built environment faces tremendous challenges in the decade to come. The climate crisis, rising concerns for health and inequality and plunging biodiversity are barriers we must — and can — overcome. With our strategy Sustainable Buildings for Everyone, Everywhere, we have mapped a pathway for tackling these impacts to meet the ambitions of the Paris Agreement and Global Global Goals for Sustainable Development (SDGs).

But the path cannot be travelled alone. Achieving our vision for the sector requires radical collaboration across sectors. It requires leadership to implement the solutions we already know exist. We need leaders like you to accelerate the decarbonisation of the built environment and this growth of sustainable buildings in the decade to come.

Tanya Cox,
Chair of the Board, World Green Building Council
LAUNCHING OUR NEW STRATEGY — SUSTAINABLE BUILDINGS FOR EVERYONE, EVERYWHERE
Using the Global Goals for Sustainable Development (SDGs) and climate science recommendations as a foundation, our strategy supports our network to lead and drive transformative and regenerative change in the built environment across three strategic impact areas: Climate Action, Health & Wellbeing, and Resources & Circularity.

#ACTONCLIMATE: OUR MOST SUCCESSFUL WORLD GREEN BUILDING WEEK EVER
Sparking over 300 events across more than 40 countries, World Green Building Week 2020 called on the built environment, governments and policymakers to #ActOnClimate by prioritising net zero buildings as a way to tackle the climate crisis.

REDEFINING HEALTH AND WELLBEING IN THE BUILT ENVIRONMENT
After a two-year global consultation across sectors, our Better Places for People project launched the much-anticipated Health & Wellbeing Framework.

DRIVING CLIMATE IMPACT IN EUROPE
We are scaling our European climate impact through our projects #BuildingLife, LIFE Level(s) and BUILD UPON2, supported by grants from EBRD, European Climate Foundation, EU Horizon 2020, IKEA Foundation and Laudes Foundation. We have also been appointed to the EU’s new Sustainable Finance advisory body.

REACHING MILLIONS WITH SUSTAINABLE BUILDINGS
Through our partnership with BBC Storyworks, the film series, Building a Better Future, reached over one million people in the first three days with solutions driving a more sustainable built environment.

SPOTLIGHTING BUILDINGS FOR COP26
We facilitated a buildings stream in the UN’s Race to Zero November Dialogues 2020. Together with nine international organisations, we advocated for a Built Environment Day at the next United Nations Climate Change Conference.
Goals for the sustainable buildings movement

Our Theory of Change
The WorldGBC network facilitates the transformation of the built environment.

Meeting the ambitions of the Paris Agreement and Sustainable Development Goals
To address the increasing effect of the building and construction sector on our human and planetary health, we have identified three impact areas critical to meeting the ambitions of the Paris Agreement and the Global Goals for Sustainable Development (SDGs). The vision of our global projects directly aligns to the targets set for 2030 and 2050 by the relevant SDGs.
State of the market

The urgency for our network’s work is greater than ever before

Scaling up climate action
Accelerating the uptake of net zero buildings

ACHIEVEMENTS

300 events across 43 countries
#ActOnClimate: Our biggest and boldest World Green Building Week campaign ever galvanises more action than ever before to promote net zero buildings.

128 signatories
The Net Zero Carbon Buildings Commitment signatories more than doubles in a year.

Building to COP26
We facilitated a buildings stream in the UN's Race to Zero November Dialogues 2020 and advocated for a Built Environment Day at the next United Nations Climate Change Conference.

CHAMPIONING REGIONAL AND LOCAL CLIMATE ACTION

Regional and national programmes are overcoming market-specific challenges:

BUILD UPON:
Led by a group of GBCs in WorldGBC's Europe network, BUILD UPON² develops solutions to scale up energy-efficient building renovation.

Cities Climate Action project
+12 cities and states across Latin America are creating policy pathways towards energy efficiency and net zero carbon buildings with the support of the GBCs.

Advancing Net Zero in Asia Pacific
GBCs are increasing awareness of the opportunities to address carbon emissions, which we highlighted in the Asia Pacific Embodied Carbon Primer.

National roadmaps
Ten European GBCs are delivering national roadmaps for whole life decarbonisation of the built environment through the #BuildingLife campaign.

Driving Change
UKGBC released a study on the cost of delivering net zero buildings; Canada GBC released a report into the opportunities for industry upskilling; Green Building Council Australia now requires all six-star rated buildings to be net zero.

See more Advancing Net Zero action from GBCs and industry in the 2020 Status Report.

RAISING GLOBAL CARBON PERFORMANCE STANDARDS

We know what the building and construction sector must do to turn the tide on carbon emissions. By focusing on operational performance, embodied carbon, and the importance of data disclosure, we can increase carbon budget transparency. Using the whole life carbon vision and framework, Green Building Councils are developing programmes to promote and deliver buildings that mitigate climate risk, increase industry capacity through training and education, and verify performance with net zero certification schemes. This ensures a flexible approach that can be tailored to solutions across different climates, cultures, and technical feasibility.

"With 39% of energy-related emissions attributed to the built environment, we cannot ignore the enormous impact the sector has on our climate. It's time to prioritise net zero buildings as a solution." - Nigel Topping, High Level Champion COP26

"The WorldGBC global network continues to drive positive change for market transformation through awareness, knowledge sharing, tool development and unwavering advocacy. Vision and goals for the future are now clearer than ever, though higher the stakes. Responsible and expedited ACTION towards a decarbonised built environment — sustained on planetary health and equality — is binding for us all." - Cesar Ulises Trevino, Director General Bioconstrucción y Energía Alternativa and former WorldGBC Board member.

"The next decade is crucial to mitigating climate change — we must act swiftly, as the decisions we make today will impact generations to come. As designers, we can do our part to reduce carbon in the built environment by working across industries, implementing measurable design goals, and utilising emerging technologies in sustainability. SOM's ongoing partnership with WorldGBC in their Advancing Net Zero initiative is testament to our commitment to collectively driving the transition to a net zero carbon future." - Mina Hasman, Associate Director, SOM
Driving a healthier built environment

Shifting the paradigm on Health & Wellbeing
After a two-year consultation, we launched the Health & Wellbeing Framework — a ‘living’ resource driving healthy and equitable buildings for everyone, everywhere.

23 countries improving air quality
As part of Plant a Sensor, GBCs in 23 countries received air quality monitors to share data and improve indoor and outdoor air quality.

WorldGBC Case Study Library reaches 108 projects
Our resource of cutting-edge examples of healthy and net zero buildings continues to grow.

Redefining Health and Wellbeing in the Built Environment
After an extensive two-year technical consultation with our network and international experts, we launched the WorldGBC Health and Wellbeing Framework.

Launched with six international and several national events, the Framework’s six principles advocate a whole lifecycle approach to health and wellbeing. The Framework reimagines the way we consider the indicators of health and can be accessed as an Executive Report and a ‘living’ educational tool. The advisory committee included GBCs from Australia, India, South Africa, Qatar, Costa Rica, Guatemala, Poland and UK.

Tackling Air Pollution
The COVID-19 pandemic has brought the relationship between human health and the built environment into focus. WorldGBC’s ‘Air Quality in the Built Environment’ campaign responded by sharing innovative leadership in how to tackle the problem.

Our global air quality monitoring programme, Plant a Sensor, now has 23 GBCs working towards real-time air quality monitoring and sharing to address the international air quality crisis. Polish Green Building Council were the first in the global network to fully participate in the programme, installing indoor and outdoor air quality monitors within their head office in Warsaw.

Securing a Healthy and Resilient Built Environment
In partnership with UN Habitat, our MENA Sustainable reconstruction and urban regeneration project is laying the groundwork for an equitable, sustainable recovery in the region. Focusing on conflict-hit areas, the project supports healthy, resource-secure and climate-resilient societies.

‘Built environment presents a fantastic opportunity for promoting our health. Cities and urban areas are a laboratory to put in place the best options for people’s health or the contrary.’

Dr María Neira, Director, Department of Environment, Climate Change and Health, World Health Organization

The Six Principles of the Health & Wellbeing Framework
Enabling resource efficiency and circularity

Achievements

Partnerships for a circular built environment

WorldGBC is supporting the World Business Council for Sustainable Development (WBCSD) to prepare a new global report on the business case for a circular built environment.

Pioneering circularity research

From procurement guidance for circular buildings to methods to apply life cycle assessment in renovation projects, GBCs have developed a host of powerful new resources.

#BuildingLife: Promoting circular construction

We launched the #BuildingLife campaign at the European Parliament to urge European industry and government to act on the total environmental impact of buildings.

The building and construction sectors account for more than 50% of all material extracted globally. In Europe, the sectors contribute to more than a third of all waste. Shifting to a circular construction economy is essential to supporting our vision for a more sustainable built environment.

#BuildingLife highlights the role that Europe’s building and construction sector can play in delivering the ambition of the EU Green Deal. Working with GBCs, governments and policymakers, the campaign advocates for deep decarbonisation and circularity in the built environment.

GBCs driving resource efficiency

Green Building Councils are tackling resource consumption head on.

For example, Alliance HQE-GBC (France) are pioneering a new method to enable LCA of renovation projects. This paves the way to realise the European Commission ambition to address whole life carbon in the newly published Renovation Wave.

WorldGBC’s European Regional Network released an online collection, profiling this and some 15 other GBC resources on circularity.

‘Climate change and resource scarcity means a circular economy is a critical component of sustainability. DGNB is actively promoting its integration into building practice with resources like our online toolbox.’

Christine Lemaline, CEO, DGNB

‘Circularity is really important to our members and it’s great to see that reflected in WorldGBC’s strategy. By promoting resources like our Think Twice Before Demolishing report with inspiring examples of refurbishment projects across the network, we can increase our impact.’

Katharina Bramslev, CEO, Norwegian Green Building Council

‘Prioritising resources and circularity in WorldGBC’s global strategy is timely and essential. It will build on the excellent work of leading GBCs... and undoubtedly inspire more!’

Peter Templeton, CEO and President, Cradle to Cradle

Stora Enso, a partner of our Europe Regional Network, teamed up with the Finnish Mutual pension insurance company Varma in the construction of a new head office in the centre of Helsinki. Designed by Anttinen Oiva Arkitehtit Oy, massive wooden elements used as construction material will cut construction time emissions significantly as well as reduce the use of non-renewable resources.

Our Partners and Sponsors

WorldGBC would like to say a huge thank you to all our partners from around the world for their ongoing commitment to our work, generous financial support and shared expertise. With their support, they ensure that we deliver impactful actions that combat climate change and position green and sustainable building as a solution to urgent environmental, social and economic issues.
Our Board of Directors

GLOBAL SUSTAINABILITY LEADERS JOIN OUR BOARD

On 1 July 2020, two leaders joined our Board: Johannes Kreissig and Jennifer Layke.

We welcome them to WorldGBC and thank our Board members, past and present, for their exceptional leadership, guidance and support.
Financial overview

WorldGBC’s increased resource capacity in 2019 led to enhanced programme services to deliver for our community of members, mainly via global and regional projects, regional networks, CEO Network of Established GBCs and campaigns like World Green Building Week.

Even though not reflected in our financial accounts, WorldGBC’s work in fundraising coordination and facilitation to its members, mainly via grants, unlocked funding for US$2.3 million that was directly received by 28 GBCs.

FINANCIAL ACTIVITIES

In 2019 WorldGBC’s revenue totalled US$2.72 million, a figure that represents an annual growth rate of 21%. Revenue from grants grew +100% to US$1 million and our organisation on-granted near US$300,000 to GBCs participating in the Cities Climate Action project (Colombia and Mexico) and support for regional network meetings.

In that same year, the organisation’s expenditure grew at a 22% annual rate to US$2.75 million. Our resources were mainly dedicated to support our GBCs through WorldGBC’s programme services, like global and regional projects, and through our diverse networks.

FINANCIAL POSITION

WorldGBC ended 2019 with US$924,758 in unrestricted net assets, a figure that increased by US$4,211 compared to 2018 and represents 33.7% of total expenses. The WorldGBC Cash Management Policy was met in 2019 as it states that the organisation should retain at least the equivalent of a minimum of 33% of its annual expenses in unrestricted net assets to cover for risks.

From the grants side of the operation, WorldGBC had a total of US$116,997 in temporarily restricted assets by the end of 2019, with a decrease of US$26,455 compared to the previous year.

AUDITOR’S OPINION AND FURTHER INFORMATION

KPMG, our auditor, issued on 16 June 2020 an unqualified opinion on WorldGBC’s 2019 audited financial statements. Our members can obtain copies of the complete audited financial statements by contacting the WorldGBC team.

The financial information presented in this annual report has been summarised, by WorldGBC management, from those audited financial statements.
